Kye Young Chun

I'm chasing my eyes for you...
and going back to that day.
The day I brought you back.
The day I stood in front of
the mirror and looked at you
openly, without even a
thought of embarrassment.

When I first conceived of the story, I wondered whether I could make it able to write an entertaining story using only ordinary topics and common character types.

Since my previous works focused more on unique characters and situations rather than the overall storyline, I would like to approach this story in a slightly different way.
